- La gestion déléguée
- La gestion sous mandat

Pour tout support en unités de compte choisi correspondant à un OPC, vous devez au préalable avoir lu attentivement les caractéristiques principales valablement indiquées dans le Document d'Informations Clés (DIC)/Document d'Informations Spécifiques (DIS).

Ces documents sont disponibles sur le site internet de la société de gestion ou de l'Autorité des Marchés Financiers pour les OPC de droit français à l'adresse électronique suivante : www.amf-france.org

Pour tout autre support en unités de compte choisi ne correspondant pas à un OPC, vous devez au préalable avoir lu attentivement les caractéristiques principales et les garder en votre possession.

Les Documents d'Informations Clés (DIC)/Documents d'Informations Spécifiques (DIS) sont mis à disposition sur le site de l'Assureur : <https://document-information-cle.cardif.fr/cgpi>

L'Assureur ne s'engage que sur le nombre d'unités de compte, mais pas sur leur valeur. La valeur de ces unités de compte, qui reflète la valeur d'actifs sous-jacents, n'est pas garantie mais est sujette à des fluctuations à la hausse ou à la baisse dépendant en particulier de l'évolution des marchés financiers et/ou immobiliers. Les supports en unités de compte présentent donc un risque de perte en capital pouvant être partielle ou totale.

Les versements et les arbitrages entrants (si autorisés) sur des supports en unités de compte correspondant à **des supports immobiliers et des supports de Private Assets** (supports de capital investissement (Private Equity), de dette privée (Private Debt) ou d'infrastructures) sont réalisés dans la limite de l'enveloppe disponible et selon les conditions prévues dans les Dispositions Spéciales dédiées à ces supports.

La part totale de la valeur de rachat affectée à des supports en unités de compte correspondant à des supports immobiliers et des supports de Private Assets (supports de capital investissement (Private Equity), de dette privée (Private Debt) ou d'infrastructures) ne doit pas excéder 10 000 000 euros et 50 % de la valeur de rachat du contrat.

De plus, les limites suivantes doivent être respectées :

- La part totale de la valeur de rachat affectée à un OPC ne doit pas dépasser 2 000 000 euros par support et par contrat,
- La part totale de la valeur de rachat affectée à une SCI ne doit pas dépasser 1 000 000 euros par support et par contrat,
- La part totale de la valeur de rachat affectée à une SCPI ne doit pas dépasser 500 000 euros par support et par contrat,
- La part totale de la valeur de rachat affectée à une SLP ne doit pas dépasser 1 000 000 euros par support et par contrat, et ne doit pas dépasser ;toutes SLP confondues 50% de la valeur de rachat du contrat
- La part totale de la valeur de rachat affectée à une Autre FIA ne doit pas dépasser 1 000 000 euros par support et par contrat,
- Conformément à l'article R. 131-1, II, 2° du Code des assurances, la part totale des engagements en unités de compte affectée à des supports de type parts ou actions d'Autres FIA, de fonds de fonds alternatifs et d'actions de sociétés commerciales (hors sociétés de capital-risque) ne peut excéder 30 % de la valeur de rachat du contrat
- La part totale de la valeur de rachat affectée à des supports de Private Assets (supports de capital investissement (Private Equity), de dette privée (Private Debt) ou d'infrastructures) ne doit pas dépasser 1 000 000 euros par support et par contrat.

(13) Ce support correspond à un Fonds de Fonds Alternatif. Conformément à l'article R. 131-1, II, 2°, du Code des assurances, l'encours affecté à ce support après opération (versement ou arbitrage), cumulé aux éventuels encours affectés à d'autres Fonds de Fonds Alternatif, des actions de sociétés commerciales non cotées (à l'exclusion des actions de sociétés de capital-risque) et des parts ou actions d'Autres FIA, ne peut pas dépasser 30% de l'ensemble de l'encours du contrat.

NC : L'information est indiquée Non Communiquée (NC) dans les cas suivants :

- lorsque l'information est indisponible car la date de création du support est trop récente ;
- lorsque la donnée n'a pas été communiquée par notre fournisseur de données ;
- lorsque la performance finale n'est pas calculable car l'une des données permettant de la calculer est manquante ;

NA : L'information est indiquée Non Applicable (NA) pour les Titres Vifs actions concernant les frais de gestion de l'actif et les rétrocessions de commissions

Les sociétés de gestion prélèvent des frais de gestion financière sur les Organismes de Placement Collectif proposés au titre du contrat.

Une partie de ces frais peut être reversée sous forme de rétrocessions de commissions au gestionnaire du contrat, et/ou, le cas échéant, au distributeur. Les frais de gestion du contrat sont prélevés par le gestionnaire du contrat en nombre d'unités de compte.

L'ensemble de ces frais diminue la performance finale du contrat.

GESTION PROFILEE VIE

La Gestion profilée Vie est un mode d'allocation de l'épargne qui tient compte du niveau d'exposition aux risques financiers, de l'horizon de détention de l'épargne et de l'espérance de rendement pour le Souscripteur en fonction du profil d'investissement de ce dernier (prudent, équilibré et dynamique).

L'allocation de chacun de ces profils est gérée en transparence à travers un support en unités de compte constitué de parts d'un organisme de placement collectif expressément utilisé à cet effet. Conformément à l'article A.132-5-4 du code des assurances, cette allocation comprend une part minimale d'unités de compte constituée d'actifs à faible risque dont l'indicateur synthétique de risque est inférieur ou égal à 2 et une part minimale d'actifs non cotés ou des titres éligibles au PEA PME-ETI.

Les parts minimales sont les suivantes :

Profils	Part minimum d'épargne affectée à des actifs à faible risque	Part minimum d'épargne affectée à des actifs non cotés ou PEA PME-ETI
Prudent	50%	0%
Équilibré	30%	4%

Le principe consistant à « ne pas causer de préjudice important » s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental.

Les informations délivrées en matière de durabilité dans le document ci-joint intitulé « *Informations précontractuelles sur la Durabilité (produits financiers visés à l'article 8 du règlement (UE) 2019/2088 et à l'article 6 du règlement (UE) 2020/852)* » visent à informer les souscripteurs de la manière dont le Fonds général de Cardif Assurance Vie (Fonds en euros) promeut des caractéristiques environnementales et/ou sociales dans ses investissements conformément à l'article 8 du règlement UE2019/2088 et UE2020/852 dit « SFDR ».

Cardif Assurance Vie met en œuvre les moyens adéquats visant à remplir et suivre les objectifs figurant dans ce document.

Cette obligation de moyens ne peut cependant constituer une obligation de résultat, notamment lorsque l'évolution et l'atteinte de ces objectifs dépend de facteurs exogènes à l'assureur (volatilité élevée des marchés financiers, décisions soudaines des entités dans lesquels le fonds en euros investi par lesquelles elles modifient leur stratégie ou classification en matière environnementale et/ou sociale, évolutions réglementaires, modification de la doctrine des régulateurs dans la définition ou l'appréciation des investissements ESG...).

En cas de modification des caractéristiques environnementales et/ou sociales, une information sera communiquée aux Souscripteurs dans l'Information annuelle ou sur le site internet de l'Assureur.

Ce produit financier (Fonds en euros thématique « Euro Private Strategies ») ne promeut pas de caractéristiques environnementales et/ou sociales et de gouvernance ni n'a pour objectif l'investissement durable au sens des articles 8 et 9 du Règlement UE2019/2088 dit « SFDR ».

Les investissements sous-jacents à ce produit financier ne prennent pas en compte les critères de l'Union européenne en matière d'activités économiques durables sur le plan environnemental au sens de l'article 7 du règlement UE2020/852 dit « Taxonomie ».

Risques en matière de durabilité

Les risques en matière de durabilité, c'est-à-dire les événements ou situations dans le domaine environnemental, social ou de la gouvernance qui, s'ils surviennent, pourraient avoir une incidence négative importante, réelle ou potentielle, sur la valeur de l'investissement, sont intégrés dans les décisions d'investissement d'Euro Private Strategies. Des exigences environnementales, sociales et de gouvernance (« ESG ») sont prises en compte pour les fonds de Private Equity via des questionnaires adressés aux sociétés de gestion. Ces questionnaires de due diligence sont renforcés sur les axes suivants :

- l'intégration des critères ESG au sein de la société de gestion sélectionnée

- la mise en œuvre de critères et du suivi ESG au niveau des entreprises sous-jacentes des Fonds.

Un comité revoit ces différents éléments d'analyse ESG lors de la prise de décision d'investissement.

Incidences probables des risques en matière de durabilité sur le rendement d'Euro Private Strategies

L'impact de la stratégie d'investisseur durable long terme de BNP Paribas Cardif se mesure difficilement sur un horizon court. La contribution au rendement sera appréciée par la résilience de ses investissements face aux risques de durabilité.

Le Fonds en euros thématique « Euro Private Stratégies » ne prend pas en compte les incidences négatives en matière de durabilité des produits.

Par investissement durable, on entend un investissement dans une activité économique qui contribue à un objectif environnemental ou social, pour autant qu'il ne cause de préjudice important à aucun de ces objectifs et que les sociétés bénéficiaires des investissements appliquent des pratiques de bonne gouvernance.

La taxonomie de l'UE est un système de classification institué par le règlement (UE) 2020 /852, qui dresse une liste d'activités économiques durables sur le plan environnemental. Ce règlement n'établit pas de liste d'activités économiques durables sur le plan social. Les investissements durables ayant un objectif environnemental ne sont pas nécessairement alignés sur la taxonomie.

Quelles caractéristiques environnementales et/ou sociales sont promues par ce produit financier ?

Ce produit financier répond à la définition de l'article 8 du règlement européen (UE) 2019/2088 dit SFDR, à savoir qu'il promeut une combinaison de caractéristiques environnementales et sociales, tout en respectant des pratiques de bonne gouvernance.

Ce produit financier exclut les pays et les entreprises ayant les notes ESG (Environnement, Social et Gouvernance) les moins performantes, et tend à faire progresser la performance environnementale et sociale de son portefeuille immobilier. Ce produit financier promeut également des investissements à impact positif qui ont une intention de générer un impact social, sociétal et/ou environnemental mesurable.

Afin de renforcer son engagement dans la lutte contre le réchauffement climatique, BNP Paribas Cardif (maison mère de Cardif Assurance Vie) a adhéré en 2021 à la Net-Zero Asset Owner Alliance (NZAOA)¹, initiative soutenue par les Nations Unies rassemblant des assureurs internationaux et des fonds de pension. L'assureur s'est engagé à aligner son portefeuille d'investissements sur une trajectoire de neutralité carbone d'ici 2050. Cet engagement est intégré dans la gestion de ce produit financier.

Les indicateurs de durabilité permettent de mesurer la manière dont les caractéristiques environnementales ou sociales promues par le produit sont atteintes.

● **Quels sont les indicateurs de durabilité utilisés pour mesurer la réalisation de chacune des caractéristiques environnementales ou sociales promues par le produit financier ?**

La réalisation des caractéristiques environnementales ou sociales promues par le produit financier est mesurable à l'aide de six indicateurs :

1. **La sélection des pays selon des critères ESG** : Ce produit financier exclut les pays les moins performants sur ces enjeux, à travers l'application des politiques pays du Groupe BNP Paribas, complétée par une analyse de la performance ESG des États. Ce filtre s'applique sur les titres émis directement par les pays (obligations d'État) et les titres des entreprises (actions et obligations d'entreprises) dont le siège social est présent dans les pays exclus.
2. **La sélection des entreprises selon des critères ESG** : Ce produit financier utilise une approche « *best-in-class* » sectorielle. Ce filtre ESG permet d'exclure les entreprises les moins performantes au sein de chaque secteur d'activité. L'application des politiques sectorielles encadre les investissements dans les domaines sensibles (tabac, charbon thermique, pétrole et gaz, etc.).
3. **L'empreinte carbone (scopes 1 et 2)² des actions et obligations d'entreprises détenues en direct (tCO₂e/M€ investi)** : Ce produit financier contribue à l'engagement pris par BNP Paribas Cardif de réduire cette empreinte d'au moins 23% entre fin 2020 et fin 2024.
4. **L'intensité carbone des producteurs d'électricité présents dans ses portefeuilles actions et obligations d'entreprise détenues en direct** : Ce produit financier contribue à l'engagement pris par BNP Paribas Cardif d'atteindre une intensité carbone inférieure à 125 gCO₂/kWh d'ici fin 2024.
5. **L'intensité carbone des immeubles de bureaux détenus en direct (en kgCO₂e/m² occupé)** : Ce produit financier contribue à l'engagement pris par BNP Paribas Cardif de réduire d'au moins 12% cette intensité entre 2020 et 2030.
6. **Les investissements à impact positif** : Ce produit financier portera l'essentiel de l'engagement pris par BNP Paribas Cardif en matière d'investissements à impact positif de 1 Milliard d'euros en moyenne par an, d'ici à fin 2025. Ces investissements incluent notamment les obligations durables, les fonds d'infrastructures d'énergies renouvelables, les logements à loyers intermédiaires additionnels.

● **Quels sont les objectifs des investissements durables que le produit financier entend notamment poursuivre et comment les investissements effectués contribuent-ils à ces objectifs ?**

Ce produit financier investit un minimum de 10 % de ses actifs dans des investissements durables. Ceux-ci sont définis par Cardif Assurance Vie pour chaque classe d'actifs ; à titre d'exemples :

- les **obligations vertes, sociales ou durables** émises par des états ou des entreprises, répondant aux exigences des normes internationales ;
- les **fonds cotés et non cotés** en proportion de leur part d'investissement durable ;
- les **infrastructures** d'énergie renouvelable ;
- les **actifs immobiliers** répondant à des normes exigeantes au niveau environnemental et/ou à des enjeux sociaux (logements à loyers intermédiaires notamment).

Ces investissements contribuent aux objectifs environnementaux et sociaux promus par le produit financier.

Les principales incidences négatives correspondent aux incidences négatives les plus significatives des décisions d'investissement sur les facteurs de durabilité liés aux questions environnementales, sociales et de personnel, au respect des droits de l'homme et à la lutte contre la corruption.

● **Dans quelle mesure les investissements durables que le produit financier entend notamment poursuivre ne causent-ils pas de préjudice important à un objectif d'investissement durable sur le plan environnemental ou social ?**

Les investissements durables de ce produit suivent la stratégie d'investissement responsable de Cardif Assurance Vie, qui prend en compte les principales incidences négatives.

La méthodologie de qualification des investissements durables - telle qu'exposée ci-dessus - permet de limiter les préjudices aux objectifs de durabilité sur le plan environnemental ou social.

Comment les indicateurs concernant les incidences négatives ont-ils été pris en considération ?

Les principales incidences négatives sont prises en compte grâce à la mise en place d'exclusions applicables à l'ensemble des entreprises et des pays investis. Un filtre

² Scope 1 : Emissions directes de gaz à effet de serre (provenant des installations fixes ou mobiles de l'entreprise). Scope 2 : émissions indirectes associées (consommation d'électricité, de froid et de chaleur)

complémentaire sur la gouvernance est appliqué sur les entreprises pour la qualification d'investissement durable.

Dans quelle mesure les investissements durables sont-ils conformes aux principes directeurs de l'OCDE à l'intention des entreprises multinationales et aux principes directeurs des Nations Unies relatifs aux entreprises et aux droits de l'Homme ? Description détaillée :

Ce produit financier applique un filtre spécifique au niveau des entreprises, basé sur des notations externes évaluant la bonne intégration des quatre piliers du Pacte Mondial des Nations Unies : le respect des normes internationales du travail, des droits de l'Homme, de l'environnement et de la lutte contre la corruption. Les entreprises écartées par ce filtre sont donc exclues de l'univers d'investissement.

La Taxonomie de l'UE établit un principe consistant à « ne pas causer de préjudice important » en vertu duquel les investissements alignés sur la Taxonomie ne devraient pas causer de préjudice important aux objectifs de la Taxonomie de l'UE et qui s'accompagne de critères spécifiques de l'UE.

Le principe consistant à "ne pas causer de préjudice important" s'applique uniquement aux investissements sous-jacents au produit financier qui prennent en compte les critères de l'Union Européenne en matière d'activités économiques durables sur le plan environnemental. Les investissements sous-jacents à la portion restante de ce produit financier ne prennent pas en compte les critères de l'Union Européenne en matière d'activités économiques durables sur le plan environnemental.

Tout autre investissement durable ne doit pas non plus causer de préjudice important aux objectifs environnementaux ou sociaux.

Ce produit financier prend-il en considération les principales incidences négatives sur les facteurs de durabilité ?

Oui

Non

La prise en considération des principales incidences négatives au niveau des investissements du produit financier s'intègre dans le cadre de gestion des risques de Cardif Assurance Vie. Les indicateurs relatifs à ces incidences négatives sont pris en considération à travers trois leviers :

- des politiques sectorielles,
- un processus d'analyse et d'intégration ESG,
- une politique d'engagement actionnarial.

Ces leviers sont détaillés dans le rapport d'investissement responsable³ de Cardif Assurance Vie. Cardif Assurance Vie renforce régulièrement chacun de ces leviers en fonction des meilleurs pratiques de place, des nouvelles thématiques à prendre en compte et des informations disponibles.

Quelle est la stratégie d'investissement suivie par ce produit financier ?

Ce produit prend en compte des critères ESG lors de l'analyse des actifs dans lesquels il investit. Cette analyse peut être qualitative et/ou quantitative. Différentes étapes structurent l'approche d'investisseur responsable de Cardif Assurance Vie. Ainsi, Cardif Assurance Vie collecte des données ESG spécifiques à chaque classe d'actifs qui sont ensuite analysées et intégrées dans les processus d'investissement.

1) Les processus de sélection et d'investissement sont adaptés de la manière suivante :

➤ Investissements dans des obligations souveraines et supranationales :

Cardif Assurance Vie analyse la performance ESG des Etats afin d'exclure de l'univers d'investissement les pays les moins performants sur ces critères.

La stratégie d'investissement guide les décisions d'investissement selon des facteurs de risques tels que les objectifs d'investissement et la tolérance au risque.

➤ **Investissements dans des entreprises :**

En complément des exclusions pays auxquelles les entreprises sont également soumises, le processus d'investissement responsable des titres détenus en direct par Cardif Assurance Vie suit les étapes suivantes :

- Un filtre est appliqué sur le respect des normes et traités internationaux. Le pays où l'entreprise a son siège social ne doit pas être sous embargo ni faire l'objet de sanctions financières ;
- Des exclusions sectorielles sont appliquées ;
- Un filtre « Best in class » ESG est appliqué, permettant d'exclure les entreprises dont le score ESG figure dans les 3 derniers déciles de son secteur d'activité ;
- Un filtre de transition carbone complète le processus ESG.

➤ **Investissements dans des actifs immobiliers :**

L'investissement en direct dans des actifs immobiliers consiste en l'acquisition, la gestion et la cession d'actifs immobiliers détenus par le produit financier. Les pratiques suivantes sont déployées pour répondre aux enjeux environnementaux :

- Pour les actifs en gestion directe, la certification/labélisation systématique des immeubles en construction (HQE⁴, BBC Effinergie⁵, BBCA Rénovation⁶, ...). Cardif Assurance Vie encourage également des modes de construction générant moins d'émissions de CO₂. Lorsque c'est possible, les immeubles en phase de rénovation et en phase d'exploitation sont certifiés. Pour la gestion et les travaux, une amélioration de la performance environnementale est toujours recherchée.
- Une analyse de l'évolution des consommations énergétiques des bâtiments tertiaires en gestion directe ainsi que de leur intensité carbone est réalisée chaque année dans le cadre de la cartographie de la performance énergétique du patrimoine immobilier.

Cardif Assurance Vie porte aussi une attention particulière à l'utilité sociale des logements en contribuant à renforcer l'offre de logements locatifs à loyers abordables notamment dans le cadre de dispositifs spécifiques (logements à loyers intermédiaires par exemple).

➤ **Investissements dans des fonds externes :**

- **Sur les fonds cotés** (fonds actions, fonds obligataires), Cardif Assurance Vie réalise une analyse ESG de la société de gestion et du fonds, notamment au travers d'un questionnaire de « due diligence » qui permet de mesurer via une notation interne le niveau d'intégration des critères ESG par le fonds.
- **Sur les fonds non cotés** (fonds de capital-investissement, fonds de dettes privées, fonds d'infrastructures), les sociétés de gestion sont interrogées sur leur processus d'intégration des critères ESG : dans un premier temps, au niveau de la société de gestion et de sa gouvernance, puis au niveau des entreprises financées par le fonds. Cette due diligence permet d'établir une notation ESG interne qui sera prise en compte lors de la validation de l'investissement.

2) Engagement par le vote et le dialogue :

Tout au long de la durée de détention des entreprises investies, Cardif Assurance Vie exerce ses droits de vote⁷ aux assemblées générales des entreprises dans lesquelles il est actionnaire, permettant ainsi de contribuer à la bonne orientation de la gouvernance des entreprises.

De plus, afin de renforcer son action dans la lutte contre le réchauffement climatique, BNP Paribas Cardif a adhéré en 2021 à l'initiative Climate Action 100+. Ses signataires se mobilisent collectivement afin d'inciter les plus grands émetteurs mondiaux de gaz à effet de serre à prendre les mesures nécessaires pour lutter contre le réchauffement climatique.

Par ailleurs, dans le cadre de ses investissements dans des fonds externes, Cardif Assurance Vie dialogue avec les sociétés de gestion afin de les inciter à intégrer davantage les enjeux extra-financiers dans leur processus de gestion. L'engagement auprès de ces dernières se fait au travers d'un questionnaire spécifique adressé aux sociétés de gestion sur leurs pratiques ESG. Il permet de cartographier et d'engager un dialogue notamment sur les pratiques d'exclusions sectorielles des sociétés de gestion et leur niveau d'intégration des critères ESG.

Cardif Assurance Vie a par ailleurs mis en place un dispositif de gestion des controverses auxquelles les sociétés investies seraient exposées. Ce dispositif associe les fonctions de contrôle et permet de prendre des décisions de gel ou de désinvestissement selon la criticité de la controverse.

Seuls les pays qui ont une notation ESG satisfaisante sont conservés dans l'univers d'investissement :

- **L'Environnement** prend en compte le mix énergétique du pays, l'empreinte carbone nationale ainsi que la ratification de traités, notamment celui sur l'Accord de Paris. L'analyse reflète aussi des indicateurs sur les émissions de gaz à effet de serre, tels que les émissions de CO2 par rapport au produit intérieur brut,
- **Le Social** mesure les politiques menées par les États à l'égard de la pauvreté, de l'accès à l'emploi, de l'accès à l'électricité ainsi que la ratification de traités sur les droits du travail et les droits des enfants,
- **La Gouvernance** intègre entre autres le respect des droits de l'Homme et le respect des droits du travail.

2. Exclusions d'entreprises :

- Exclusion des entreprises productrices, grossistes et distributrices dont plus de 10% du chiffre d'affaires est dérivé du tabac.
- Mise en place d'un calendrier de sortie du charbon thermique sur l'ensemble de la chaîne de valeur (développeurs, entreprises minières, logistiques et producteurs d'électricité) en complément de l'engagement pris par BNP Paribas de sortir du charbon thermique au plus tard en 2030 pour les pays de l'Union Européenne et de l'OCDE et au plus tard en 2040 pour le reste du monde.

Ce filtre permet d'identifier les entreprises engagées dans la transition vers une économie bas carbone. Les entreprises qui émettent plus d'1 million de tonnes équivalent CO2 et dont la stratégie de transition énergétique est jugée faible (notation fournie par Moody's ESG inférieure à 30) sont exclues de l'univers d'investissement.
